Summary

Software Developer with **3+ years of experience** specializing in **React Native and React.js**, building production mobile and web applications. Experienced in modernizing legacy systems, designing scalable UI architectures, API integration, performance optimization, and end-to-end mobile application delivery.

Experience

Software Developer
Drivex Mobility Pvt. Ltd.

Jul 2023 – Present
Bangalore

- Migrated legacy application architecture into a **monorepo/shared codebase**, enabling multiple production applications including **BikeScan and InspectX** with reusable features and minimal duplication
- Developed **InspectX** from the BikeScan codebase, enabling Inspection-as-a-Service and accelerating delivery of a new product line
- Refactored legacy monolithic UI into **reusable components and independent sections**, replacing a single API with **section-specific APIs** for better scalability and independent data loading
- Implemented **configuration-driven development** with a custom rendering engine that dynamically maps configuration to reusable UI components, reducing hardcoded screen logic
- Upgraded **React Native 0.74 → 0.84** and **React 18 → 19**, reducing app size from **25MB to 19MB**; improved performance by **40%** using Zustand, TanStack Query, and rendering optimizations
- Built **Fastlane CI/CD**, OTA updates, RBAC for **500+ users**, device security checks, NativeWind migration, and automated testing using **Vitest + React Testing Library**

[...more](#)

Frontend Developer
Sirpi Products and Services Pvt. Ltd.

Jan 2023 – Jul 2023
Bangalore

- Built **ProcX** using React.js and Material UI to aggregate B2B/C2B vehicle data with filtering, data management, and export workflows
- Optimized large dataset rendering and implemented dynamic EMI calculations and filtering, contributing to approximately **20 Crore in procurement cost savings**

Achievements

- **End-to-End Inspection Digitization:** Replaced inspection processes previously dependent on Excel sheets with **100% digital workflows through BikeScan**, covering vehicle inspection, logistics pickup, technical store delivery, and receiving operations
- **Connected Vehicle Logistics Workflow:** Extended BikeScan across the complete vehicle journey — inspection and pickup by logistics, delivery to the technical store, security guard vehicle-received marking, refurbishment movement, and logistics drop-off tracking
- **Digital PRI Process:** Integrated refurbishment and technical-store workflows into BikeScan, enabling security teams to mark vehicle movement and store teams to complete **PRI inspection digitally** instead of relying on manual tracking

Skills

Frontend: React.js, React Native, JavaScript (ES6+), TypeScript, React 18/19, Material UI, NativeWind, Tailwind CSS
Architecture: Monorepo, Shared Codebase, Modular UI, Component Architecture, Configuration-Driven Development, Rendering Engine
State & Data: Zustand, TanStack Query, REST APIs
Mobile & DevOps: Android/iOS, Fastlane, OTA Updates, JailMonkey, App Signing, Provisioning, GitHub Actions, CI/CD
Testing & Backend: Vitest, React Testing Library, Node.js, Express.js, Spring Boot, JWT, MongoDB, MySQL, AWS EC2

Projects

Student Management API

Node.js, Express.js, MongoDB

- Built REST API with **JWT authentication, CRUD operations, filtering, pagination**, and secure route protection

Music Streaming API

Spring Boot, JPA, Hibernate, MySQL

- Developed REST API with **CRUD operations, RBAC, admin controls**, and MySQL persistence using JPA/Hibernate

Restaurant Management API

Spring Boot, REST, Swagger

- Built REST API with **RBAC, Swagger documentation, menu/order management**, and request validation

Education & Certifications

B.E. Information Science & Engineering — Brindavan College of Engineering (VTU), Bangalore

2018–2022

Certifications: Full Stack Development (Board Infinity) | React Native & React (Udemy)
